WHY SPRING IS THE BEST TIME TO REFINANCE

For many people, spring is a premier time to pull the trigger on mortgage refinancing. Here we share the top three reasons:

- **You'll have the best opportunity to utilize proceeds:** Many people choose to refinance as a way to get cash back for a significant remodel. By refinancing in the springtime, you have spring, summer, and fall to work on these projects.
- **Spring clean your finances:** Spring is a good time to "clean up" and get things straightened out.
- **The interest rates may go up:** Rates may be higher by the time summer or fall arrives.

SEASONAL SAVINGS GUIDE

Here are a few ways you can make some hidden savings each month.

April: Spring is near, and temps are rising. When they do, embrace the natural warmth by turning off the heat and opening the windows. Letting in the fresh air will not only improve your health but also your heating bill.

May: Create a "green" environment and save money on food by planting a garden now and making your own compost. You can potentially save thousands of dollars by producing your own fresh, pesticide-free produce as opposed to buying it retail at the market.
